Access: 4 months

Timing: Self-paced with no set meeting time

PD Hours: 3 Professional Development Hours

Credits: 1 Graduate Level PD Credit Available

Topics Covered:

- Confidence With Elementary Mathematics
- Growth Mindset

One tree will be planted per registration
(partnership with One Tree Planted).

About This Workshop

If you're an elementary school teacher who wants to feel more comfortable teaching and doing mathematics, this mini workshop is for you. My goal is to help you feel more confident in your mathematical abilities so that you know how to help students feel more confident in theirs too.

We'll begin by exploring both what it means to be "good at math" and how we help people see that they're good at math too. Then we'll talk about how to build more confidence in the math we teach as well as how to help people see that they're using math everywhere. From there we'll discuss how to ask questions to help students see that math is creative and conclude by planning out how we continue this growth.

About the Instructor

Howie Hua

Howie Hua is a math instructor at Fresno State who teaches math to future elementary school teachers. He is passionate about finding ways to humanize the math classroom and build mathematical confidence in students. In 2019, Howie was named Outstanding Lecturer for the College of Science and Math at his university.
